#	Modules	Features	Tasks	UI/UX Total (man-hour)	Frontend (Responsive) (man-hour)	Backend (API + AI) (man-hour)	QA (man-hour)	Total (man-hour)	Total (man-day)
1	**Phase 1 – Requirement Understanding, Clarification & WBS Preparation (Days 1-3)**			**0.00**	**0.00**	**24.00**	**0.00**	**24.00**	**3.00**
		Requirement Analysis & Clarification	Study the business document end to end and clarify scope, features, constraints and acceptance expectations with the trainer	0.00	0.00	6.00	0.00	6.00	0.75
			Raise clarification questions with the trainer; record answers and agreed assumptions in the clarification document	0.00	0.00	2.00	0.00	2.00	0.25
		Work Breakdown Structure (WBS)	Prepare a 20-working-day Work Breakdown Structure (WBS) by dividing the project scope into modules, features and tasks, with effort estimates for each task	0.00	0.00	8.00	0.00	8.00	1.00
		Product Identity & Technology Selection	Propose the project name, one-line positioning statement and rationale	0.00	0.00	1.75	0.00	1.75	0.22
			Survey candidate technologies for video, transcription, CV parsing and AI reasoning; record initial research notes	0.00	0.00	1.75	0.00	1.75	0.22
		Risk, Architecture & Repository	Prepare the risk register covering likelihood, impact and mitigation	0.00	0.00	1.00	0.00	1.00	0.13
			Draft the high-level architecture and LangGraph agent design	0.00	0.00	1.75	0.00	1.75	0.22
			Set up the GitHub repository with folder structure, README skeleton and ignore rules; share it with the trainers and commit incrementally	0.00	0.00	1.75	0.00	1.75	0.22
2	**Foundation & Environment Setup (Days 4-5)**			**0.00**	**3.50**	**12.50**	**0.00**	**16.00**	**2.00**
		Backend Foundation	Create the API service skeleton with health endpoint, environment-based configuration and auto-generated API documentation	0.00	0.00	1.00	0.00	1.00	0.13
			Add request validation, uniform error handling that does not expose internals, and structured logging without personal data	0.00	0.00	1.00	0.00	1.00	0.13
			Async job framework for long-running AI operations with job status / progress endpoints	0.00	0.00	1.00	0.00	1.00	0.13
		Containerisation & Environment	Containerise backend, frontend and supporting services; orchestrate them with persistent volumes and health checks	0.00	0.00	1.00	0.00	1.00	0.13
			Environment-based configuration with a sample file; single-command startup and documented commands	0.00	0.00	0.50	0.00	0.50	0.06
		Database Schema & Models	Design and implement schema and models for users, job profiles, candidates, CVs, screening results, scores, interviews, transcripts, analyses and assessments	0.00	0.00	1.50	0.00	1.50	0.19
			Schema setup and sample data loading support	0.00	0.00	0.50	0.00	0.50	0.06
		Authentication & Role Separation	Lightweight authentication for two roles (Interviewer, Candidate) with protected endpoints so a candidate cannot reach scoring or assessment data	0.00	0.00	1.00	0.00	1.00	0.13
			Login screen and role-based navigation	0.00	1.00	0.00	0.00	1.00	0.13
		Frontend Foundation	Set up the frontend with a basic layout, page navigation, and a connection to the backend API.	0.00	1.50	0.00	0.00	1.50	0.19
		CV Upload & Parsing Pipeline	CV upload for single and batch files with file type and size validation	0.00	0.00	1.00	0.00	1.00	0.13
			Text extraction from PDF and DOCX with a fallback for scanned documents; unreadable files are skipped and logged without stopping the batch	0.00	0.00	1.50	0.00	1.50	0.19
			Extract structured attributes: contact details, education, work history, skills, certifications and projects	0.00	0.00	1.00	0.00	1.00	0.13
			CV upload screen with per-file status	0.00	1.00	0.00	0.00	1.00	0.13
		Base LangGraph Graph & State Definition	Define shared state and reusable base graph structure; keep workflow state so long-running work can resume after a restart	0.00	0.00	0.50	0.00	0.50	0.06
			AI model access layer with timeouts, retries and a clear failure state	0.00	0.00	1.00	0.00	1.00	0.13

3	**Pre-Interview Core – CV Screening, Ranking & Candidate Scoring (F1, F2) (Days 6-8)**			**0.00**	**7.50**	**16.50**	**0.00**	**24.00**	**3.00**
		Job Requirement Profile Management	Define and manage multiple job requirement profiles (create, edit, list, archive): required and preferred skills, qualifications, minimum experience, additional criteria, and mandatory flags	0.00	0.00	2.00	0.00	2.00	0.25
			AI-assisted drafting of job description and requirements for the interviewer	0.00	0.50	1.00	0.00	1.50	0.19
			Job profile list and create/edit screens	0.00	2.50	0.00	0.00	2.50	0.31
		Semantic CV-to-Requirement Matching	Match CV attributes to requirements using semantic understanding, not literal keywords only	0.00	0.00	1.50	0.00	1.50	0.19
			Mark each requirement as met, partially met or unmet with evidence and explanation from the CV	0.00	0.00	1.50	0.00	1.50	0.19
			Exclude candidates who fail a mandatory requirement from the shortlist and record the reason	0.00	0.00	1.00	0.00	1.00	0.13
			Fail-safe handling so one problematic CV never stops the batch; per-CV processing status	0.00	0.00	1.00	0.00	1.00	0.13
		Candidate Ranking	Ranking logic that orders screened candidates by relative suitability	0.00	0.00	1.50	0.00	1.50	0.19
			Run screening for a batch as a background job with progress feedback	0.00	0.50	1.00	0.00	1.50	0.19
		AI-Based Candidate Scoring	Score technical skills, relevant experience and qualifications (additional dimensions possible) using job-relevant criteria only	0.00	0.00	2.00	0.00	2.00	0.25
			Configurable weights per dimension, with AI-suggested defaults that can be adjusted per job profile	0.00	0.50	1.00	0.00	1.50	0.19
			Aggregate score with per-dimension breakdown and short justification for each dimension	0.00	0.00	1.50	0.00	1.50	0.19
			Stable, repeatable scores on repeated runs; persist scores for later retrieval	0.00	0.00	1.50	0.00	1.50	0.19
		Screening, Ranking & Scoring UI	Screening results screen with ranked candidates and excluded candidates list	0.00	1.50	0.00	0.00	1.50	0.19
			Candidate detail with requirement match and score breakdown	0.00	2.00	0.00	0.00	2.00	0.25
4	**During-Interview Core, Part 1 – AI-Powered Video Interview (F3) (Days 9-11)**			**0.00**	**12.50**	**11.50**	**0.00**	**24.00**	**3.00**
		Interview Session Management	Create and schedule one-to-one interviews for a future date and time, email each candidate linked to a specific candidate and job profile	0.00	0.00	1.50	0.00	1.50	0.19
			Manage the session lifecycle (create, join, conduct, end); persist start and end times and participants	0.00	0.00	1.50	0.00	1.50	0.19
			Generate a unique, secure join link per candidate session and restrict access to the invited candidate	0.00	0.00	1.50	0.00	1.50	0.19
			Interview scheduling and interview list screens for the interviewer; join screen for the candidate	0.00	3.00	0.00	0.00	3.00	0.38
		Video Communication	Browser-based real-time audio and video between interviewer and candidate (a real-time media approach or managed video service can be used)	0.00	1.50	2.50	0.00	4.00	0.50
			In-call controls: mute, camera toggle, end session	0.00	1.50	0.00	0.00	1.50	0.19
			Interview room with role-specific views; the candidate never sees scoring or assessment data	0.00	3.50	0.00	0.00	3.50	0.44
		Continuous Audio Capture	Capture each participant's audio continuously, tag it with participant and role, and route it into the transcription pipeline	0.00	1.00	1.50	0.00	2.50	0.31
			Treat raw audio and video as temporary data only and discard it once processed	0.00	0.00	0.50	0.00	0.50	0.06
		Network Resilience	Reconnect participants automatically to the same session after a network drop without losing captured data	0.00	1.00	1.50	0.00	2.50	0.31
		Session Stability	Tune stability over a typical interview length and alongside background CV processing; prepare a two-participant local demo setup	0.00	1.00	1.00	0.00	2.00	0.25
5	**During-Interview Core, Part 2 – Speech Recognition & Transcription (F4) (Days 12-13)**			**0.00**	**4.00**	**12.00**	**0.00**	**16.00**	**2.00**

		Speech-to-Text Integration	Stream each participant's audio to a speech-to-text service (cloud service or self-hosted engine can be used) and receive interim and final English text	0.00	0.00	2.50	0.00	2.50	0.31
			Show a clear error state when the transcription service fails, without crashing the session or losing the transcript so far	0.00	0.00	1.00	0.00	1.00	0.13
		Speaker Attribution & Timestamping	Attribute every utterance to interviewer or candidate using the participant and role of each audio source (channel separation)	0.00	0.00	1.50	0.00	1.50	0.19
			Timestamp each utterance (elapsed and clock time); keep overlapping speech as separate entries	0.00	0.00	1.00	0.00	1.00	0.13
		Structured Transcript & Persistence	Build the structured transcript as ordered, speaker-attributed, timestamped turns for the whole conversation	0.00	0.00	1.50	0.00	1.50	0.19
			Save the transcript incrementally during the session; retrieve it after the session and after a restart	0.00	0.00	1.00	0.00	1.00	0.13
		Live Transcript Display	Push transcript turns to the interviewer's screen in near real time	0.00	0.50	1.00	0.00	1.50	0.19
			Live transcript panel with speaker labels and auto-scroll	0.00	2.00	0.00	0.00	2.00	0.25
		Transcript Viewer	Transcript viewer for completed interviews with search and timestamp navigation	0.00	1.50	0.50	0.00	2.00	0.25
		Transcription Robustness	Handle accents, silence, overlapping speech and low-confidence output without failing; measure transcription delay	0.00	0.00	2.00	0.00	2.00	0.25
6	**Post-Interview Core – Q&A Analysis & Consolidated Assessment (F5, F6) (Days 14-15)**			**0.00**	**4.50**	**11.50**	**0.00**	**16.00**	**2.00**
		Question–Answer Segmentation	Segment the transcript into question–answer pairs and link each response to the question that prompted it, including follow-ups and clarifications	0.00	0.00	1.50	0.00	1.50	0.19
			Split multi-part questions into separate pairs; keep greetings and small talk in the transcript but exclude them from evaluation	0.00	0.00	1.00	0.00	1.00	0.13
		Response Evaluation	Evaluate each response for relevance, technical accuracy, completeness and quality of articulation	0.00	0.00	1.50	0.00	1.50	0.19
			Verify accuracy against approved reference material instead of model knowledge alone (a retrieval-based approach can be used)	0.00	0.00	1.50	0.00	1.50	0.19
			Write a short justification per evaluation that points to the supporting transcript segment	0.00	0.00	1.00	0.00	1.00	0.13
		Requirement Coverage Mapping	Map questions and answers to the job requirements they address; list requirements never explored	0.00	0.00	1.50	0.00	1.50	0.19
		Q&A Analysis Screens	Q&A analysis view with pair-wise evaluation and justification, and requirement coverage view	0.00	2.00	0.00	0.00	2.00	0.25
		Consolidated Candidate Assessment	Merge screening results, candidate scores and Q&A analysis into one assessment with component scores and an overall suitability position	0.00	0.00	1.50	0.00	1.50	0.19
			Summarise strengths, weaknesses, evidence gaps and areas for further verification; link each conclusion to CV content or a transcript segment	0.00	0.00	1.00	0.00	1.00	0.13
		Report View & Export	Assessment report view	0.00	1.00	0.00	0.00	1.00	0.13
			Export or print the report in a readable format	0.00	0.50	0.50	0.00	1.00	0.13
		Candidate Comparison	Side-by-side comparison of assessed candidates for the same job role	0.00	1.00	0.50	0.00	1.50	0.19
7	**Creative / Innovation Feature (F11) (Days 16-17)**			**0.00**	**4.50**	**11.50**	**0.00**	**16.00**	**2.00**
		Concept & Rationale	Finalise the innovation concept after weighing alternatives; confirm it enhances the platform and does not repeat an existing feature	0.00	0.00	1.00	0.00	1.00	0.13
			Write the rationale document: problem solved, who benefits, value added, why it was prioritised	0.00	0.00	1.00	0.00	1.00	0.13
		Feature Design	Design the data flow, workflow or API, and integration points with existing modules	0.00	0.00	1.00	0.00	1.00	0.13
			Design the screen(s) for the feature	0.00	1.00	0.00	0.00	1.00	0.13
		Feature Implementation	Implement backend and AI workflow logic with persistence and error handling	0.00	0.00	5.00	0.00	5.00	0.63

			Implement feature screens with loading, error and empty states	0.00	3.00	0.00	0.00	3.00	0.38
		Platform Integration	Integrate the feature into the existing candidate, interview and assessment flows	0.00	0.50	1.00	0.00	1.50	0.19
		Testing & Documentation	Test against the sample data set and fix defects	0.00	0.00	2.00	0.00	2.00	0.25
			Document the feature in the README as the Innovation Feature	0.00	0.00	0.50	0.00	0.50	0.06
8	**Stretch Features & Hardening (F7-F10) (Day 18)**			**0.00**	**3.50**	**4.50**	**0.00**	**8.00**	**1.00**
		Candidate Identification & Real-Time Profile Overview (Optional)	Identify the joining candidate from the session and stored records; show a profile panel (name, experience, key skills, pre-interview score, areas to probe); handle unidentified candidates explicitly	0.00	1.00	0.50	0.00	1.50	0.19
		CV Claim Verification Through Interview Analysis (Optional)	Cross-check CV claims against interview answers; flag contradictions, unverified claims and undiscussed claims as follow-up prompts for a human, not accusations	0.00	0.50	1.00	0.00	1.50	0.19
		Comprehensive Candidate Interview Scoring (Optional)	Interview performance score separate from the CV score, with per-dimension breakdown and evidence	0.00	0.50	0.50	0.00	1.00	0.13
		Interview Quality Assessment (Optional)	Assess interviewer questions, competency coverage and speaking-time balance; produce improvement recommendations	0.00	0.50	0.50	0.00	1.00	0.13
		Core Hardening	Strengthen error handling, logging, input validation and access separation; keep secrets in environment configuration	0.00	0.00	1.00	0.00	1.00	0.13
			Privacy controls: deletion of a candidate and associated data through an administrative endpoint, data minimisation and job-relevant-only scoring checks	0.00	0.00	1.00	0.00	1.00	0.13
			UI polish and usability: progress feedback and understandable error messages	0.00	1.00	0.00	0.00	1.00	0.13
9	**Integration, Testing & Documentation (Day 19)**			**0.00**	**0.50**	**7.50**	**0.00**	**8.00**	**1.00**
		Software Requirements Specification	Prepare the SRS: actors, use cases, functional and non-functional requirements, constraints and acceptance criteria	0.00	0.00	2.00	0.00	2.00	0.25
		End-to-End Testing	Run a full end-to-end test with all 20 sample CVs and a mock interview through to the consolidated report; fix defects	0.00	0.00	1.50	0.00	1.50	0.19
			Measure and record the time to parse, screen, score and rank 20 CVs	0.00	0.00	0.50	0.00	0.50	0.06
		Clean-Machine Docker Verification	Verify one-command startup on a clean machine; validate build, run, stop and reset commands	0.00	0.00	1.00	0.00	1.00	0.13
		Documentation	Complete the README: name and positioning, features, architecture, technology justification, setup, configuration, usage, privacy notes, external services used, known limitations	0.00	0.00	1.00	0.00	1.00	0.13
			Final architecture diagram, LangGraph design as built, privacy and data handling note, updated WBS	0.00	0.00	1.00	0.00	1.00	0.13
		Presentation Preparation	Prepare the presentation deck and demo script; anonymise all demonstration material	0.00	0.50	0.50	0.00	1.00	0.13
10	**Final Submission & Presentation (Day 20)**			**0.00**	**0.50**	**7.50**	**0.00**	**8.00**	**1.00**
		Final Bug Fixes & Code Freeze	Fix remaining defects, clean up the code and freeze the release	0.00	0.50	2.00	0.00	2.50	0.31
		Release & Submission	Confirm no secrets or personal data are in the repository, tag the final release and submit the repository	0.00	0.00	1.00	0.00	1.00	0.13
		Presentation Rehearsal	Rehearse the live demo and prepare answers on architecture, workflow design and key decisions	0.00	0.00	2.00	0.00	2.00	0.25
		Final Presentation & Demonstration	Deliver the presentation: problem framing, project name and positioning, architecture walkthrough, live demo, innovation feature justification, lessons learned and Q&A	0.00	0.00	2.50	0.00	2.50	0.31
			Total(man-hours)	**0.00**	**41.00**	**119.00**	**0.00**	**160.00**	
			Total(man-days)	**0.00**	**5.13**	**14.88**	**0.00**	**20.00**	**20.00**
			Total(man-months)	**0.00**	**0.26**	**0.74**	**0.00**	**1.00**	**1.00**
